## MEDIA RELEASE

### **Allied Moulded Products, Inc. expands ULTRALINE® AMU Series product offering**

Fiberglass reinforced polyester enclosures manufactured by the experts of nonmetallic electrical enclosures

BRYAN, Ohio, August 1, 2019 – Allied Moulded Products, Inc., an industry leader in nonmetallic electrical boxes and enclosures for industrial and commercial applications, is expanding its ULTRALINE® AMU Series of fiberglass reinforced polyester (FRP) enclosures.

The ULTRALINE AMU Series has been available for several years and was designed primarily for OEM panel builder applications that required JIC sizes. Allied Moulded is expanding the series with a new size: 10" x 8" x 6" (base part number AMU1086). This new size is being offered with the same features and aesthetics of the existing ULTRALINE product family.

“Our ULTRALINE series of FRP enclosures is great for many different industries,” explains Terry Hernandez, National Sales Manager. “We’re excited to offer an additional size to fit the needs of our end users; and these enclosures are robust for both indoor and outdoor applications.”

ULTRALINE comes standard with patented, multi-mounting capability, including an out-of-the-box mounting flange or adjustable mounting feet that adapt to various mounting configurations. The series features metallic or nonmetallic latches and molded-in latch keepers and mounting bosses, as well as a tongue-and-groove seal joint between cover and base. A clear polycarbonate cover option is also available for instrumental applications where critical electronic equipment must be visible yet protected from the elements.

Allied Moulded continues to be a leading manufacturer of nonmetallic electrical enclosures and a “one-stop resource” where fiberglass and polycarbonate products can co-exist depending on the specific application characteristics and chemical compatibility requirements.
